Index

aberration of gravity, 110
accelerated frames, 52
accelerating expansion, 201
accelerating frames of reference, 53
accelerating towards Andromeda galaxy, 57
acceleration, 36
acceleration (angular) derived, 231
acceleration (angular) in orbit, 230
acceleration algorithm, 56
acceleration and elapsed coordinate time, 55
acceleration and gravity, 222
acceleration and Lorentz transformation, 53
acceleration and radius of curvature, 64
acceleration and space curvature, 224
acceleration and time, 54
acceleration and transverse movement, 223
acceleration at the peri- or apoapsis, 230
acceleration conversion factor, 74
acceleration derivations, 228
acceleration over long distances, 56
acceleration with pure radial velocity, 229
acceleration:constant force, 228
acceleration:centripetal, 82
acceleration:radial geodesics, 78
acceleration:radial movement, 77
acceleration:transverse geodesics, 82
acceleration:transverse movement, 81
action at a distance, 110
addition of momentum, 43
addition of velocities, 38, 43
addition of velocities, 43
additive acceleration, 84
aether-drift, 34
age of the universe, 200
angular momentum defined (Newton), 89
angular momentum equation (Newton), 90
angular momentum equation (relativity), 95
angular momentum parameter, 91, 95
aphelion, 94
astronomical cycle of Moon, 130
binary neutron stars, 112
binary pulsars, 112
black hole, 99, 132
Ceiphed variables, 202
center of curvature, 52
center of geodesic curvature, 70
centrifugal acceleration, 83, 104
Cepheids, 209
circular orbit, 82, 83, 91, 103
classical vacuum, 192
coastal tides, 124
Coma cluster, 203
comoving coordinates, 165
conic section, 104
conservation of energy, 89
cosmic microwave background (CMB), 204
cosmic microwave background radiation, 179
cosmic teardrop, 178
cosmic voids, 161
cosmological constant, 186
cosmological redshift parameter, 177
cosmological redshift, 203
cosmological units, 170
cosmology, 160

cosmology:symbology of, 169
critical expansion rate, 186
curvature and acceleration, 52
curvature center constructed, 56
curvature, 166
curvature center, 52
curvature circle, 53
curvature radius, 52
curvature:positive, 167
curvature:radius of, 167
curved space, 72
curved spacetime, 72
curved time, 72
degenerative epoch, 196
density of the universe, 182
density parameter (epoch dependency), 184
density parameter (the stability of), 185
density parameter as function of expansion factor, 184
desynchronization of clocks, 59
desynchronization, 60, 61
differential equation, 66, 95, 105
distance ladder, 202
distance ladder, 205
distance parameter, 104
distant observer, 19, 27, 28, 29, 74
Doppler calculations, 47
Doppler shift (Newtonian), 44
Doppler shift (one way), 44
Doppler shift (relativity), 46
Doppler shift (two way), 46
Doppler shift fractional, 204
Doppler-radar, 78
effective potential, 96
effective potential equation (relativity), 96
effective potential of light, 100
effective potential parameter, 91
Einstein summation convention, 21
Einstein synchronization, 33
Einstein-de Sitter model, 171
Einstein's field equations, 24
ellipticity of orbit, 94
energy - kinetic, 89
energy - potential, 89
energy density of the vacuum, 192
energy equation, 42
energy of the vacuum, 58
energy-momentum tensor, 24
escape energy, 91
escape velocity, 79, 81
Escher's infinite lattice, 162, 163,164
event horizon, 26, 73, 74, 81
expansion (power function), 194
expansion factor, 165
expansion law, 175, 180
expansion law for a 'curved' universe, 183
expansion law for the Einstein-de Sitter universe, 175
expansion rate increasing?, 195
exponential expansion, 190
extreme danger radius, 100
false vacuum, 192
Friedmann equation, 182
galaxy, 160
galaxy:clusters of, 161
galaxy:Milky Way, 161
galaxy:supercluster Virgo, 161
galaxy:supercluster, 161
Galileian mechanics, 34
Galileian spacetime, 32
general theory of relativity (introduction), 24
geodesic center, 67
geodesic center for Earth, 67
geodesic equations, 104
geodesic equations, 95
geodesic movement, 132
geodesics, 66
geodesics in curved spacetime, 67
geometrized units, 221
geometrized mass, 221
geometrized speed, 221
geometry of the universe, 200
g-force, 100
Giga-annum (Ga), 170
Giga-lightyear (Gly), 170
Gigayear (Gy), 170
gradient of curved space, 28
gravitational field, 24,68
gravitational redshift, 29
gravitational redshift, 29, 72

gravitational time dilation, 27, 61, 72
gravitational waves, 112, 139
gravitational waves and binary black holes, 140
gravitational waves and tidal gravity, 139
gravitational waves as curvature oscillations, 141
gravitational waves: binary pulsar, 143
gravitational waves: coalescence of binary black holes, 143
gravitational waves: cosmic music, 147
gravitational waves: detection, 143
gravitational waves: laser interferometry, 145
gravitational waves: LIGO facility, 145
gravitational waves: LISA project, 148
gravitational waves: polarization, 141
gravitational waves: strength of, 144
gravitational waves: transmitter/antenna concept, 141
gravitational waves: Weber bars, 144
gravity - speed of, 109
gravity and moving objects, 77
gravity as geometry, 66
gravity-static, 66
harmonic analysis and prediction, 130
harmonic constituents, 130
Heisenberg's uncertainty, 34
helix in spacetime, 82
horizon problem, 189
Hubble constant, 163, 174, 179, 201
Hubble distance, 178
Hubble flow, 163, 164, 203
Hubble radius, 201
Hubble time, 178
Hubble's law, 163
hyperspace dimension, 72
hyperspace, 166
inertial frame, 18
inertial observer, 19
inflation (expansion rate), 193
inflation, 190
invariant spacelike interval, 40
invariant timelike interval, 39
Irvin Shapiro, 123
isotropic movement, 38
isotropy of light, 39
k as a 'curvature switch', 182
Kepler's laws, 92
Kepler's first law for planetary orbits, 92
Kepler's second law for planetary orbits, 93
Kepler's second law, 90,93
Kepler's third law for planetary orbits, 93
last scattering, 179
leap-seconds, 131
length contraction, 41
light (effective speed), 122
light deflection (corpuscular theory), 120
light deflection (Eddington's mission), 119
light deflection formula, 120
light deflection, 119
light-its peculiar nature, 31
lightlike interval, 16
Light-principle, 16
light's singularity, 32
lightyear, 170
line element, 21
linear acceleration, 51
local observer, 27, 28, 29, 74
local speed of light, 100
long baseline interferometry, 120
look-back distance, 204
look-back time, 179
Lorentz transformation , 16, 39
L-principle, 16
luminosity, 200
mass, energy and momentum, 41
matter dominated epoch, 194
Maxwell's equations, 111
Megaparsec (Mpc), 170

Mercury, 105
metric tensor, 21
Michelson interferometer, 146
Michelson-Morley, 34
micro-gravity, 136
Minkowski metric, 21
Minkowski spacetime diagram, 36
momentum summation, 43
momentum, 41
moon a planet?, 137
muon particle, 20, 79
muon, 80
MWAP, 201
neutron star, 132
Newton gravitation, 68
Newton potential, 68
Newtonian acceleration, 67
Newtonian dynamics, 86
Newtonian gravity 'geometrized', 70
Newtonian orbits, 103
Newton's gravity, 88
Newton's orbit energy, 92
Newton's speed of light, 87
non-circular orbit, 83, 84
numerical solution, 105
numerically integrate, 105
observables, 200
one-way speed of light, 33, 34, 39
open, flat and closed universes, 182
opposing acceleration, 75, 79, 87
opposing force, 87
opposing transverse acceleration, 85
orbit (numerical integration, second order), 115
orbit of light, 101
orbit: marginally bound radius, 99
orbit: marginally stable radius, 99
orbital dynamics, 89
orbital energy, 90
orbital equation (Newton), 103, 104
orbital equation for light, 107
orbital equation, 103, 105
orbital equations (relativistic), 104
orbital parameters, 96
orbits - relativistic, 95
orbits in Newton dynamics, 90
orbit's turning points, 97
parallax, 206
parallax:annual, 170
Parametrized Post-Newtonian (PPN) formalism, 149
parsec, 170
periapsis, 106
perihelion, 83
perihelion shift, 105
perihelion shift of Mercury, 118
phase transition, 192
photon, 33
Planck length, 192
Planck time, 192
planet Mercury, 94
poor man's orbit, 107
post-Newtonian approximation, 150
post-Newtonian approximations, 149
PPN approximation equation, 152
PPN line element, 153
PPN metric tensor, 153
PPN parameters, 155
PPN potentials, 156
PPN: Brans-Dicke theory, 159
PPN: conformally flat space, 151
PPN: deflection of light, 157
PPN: isotropic coordinates, 150
PPN: isotropic radial distance, 150
PPN: perihelion shift of Mercury, 158
PPN: solar system tests, 157
PPN: time delay of light, 158
proper distance, 165
proper motion, 207
propertime interval, 19
pulsar, 112
quantum fields, 187
quasi-Newtonian acceleration, 68, 221
quasi-Newtonian geodesic, 70
quasi-Newtonian orbit, 107
quasi-Newtonian time dilation, 70
radiation dominated epoch, 194
radiation energy density, 184
radius of geodesic curvature, 73
recession velocity, 204
redshift factor, 74
redshift, 176, 200

redshift:and expansion factor, 177
redshift:distance and Hubble constant, 179
relativistic acceleration from rest, 72
relativistic gravitaitonal acceleration, 71
relativistic orbit, 84, 104
relativistic term, 105
relativity of simultaneity, 36
relativity principle, 15
relativity revival, 139
relativity, 15
rest energy, 41
rest mass of photon, 100
rest mass, 41, 42
retarded position, 110
Ricci tensor, 24
Sagnac effect, 218
Sagnac: absolute rotation, 220
Sagnac:'infinite' loop, 220
scale factor, 168
Schwarzschild black hole, 26, 99
Schwarzschild coordinates, 79, 83
Schwarzschild geometry, 67
Schwarzschild metric tensor, 25
Schwarzschild metric, 25, 71, 72, 95
Schwarzschild radius, 26
Schwarzschild solution, 24
Schwarzschild speed of light, 122
second order differential equation, 106
semi-diurnal period, 129
shape of expansion, 200
Shapiro time delay experiment, 123
simultaneity, 36
singularity, 97
Small Magellanic Cloud, 202
space curvature, 72, 79, 80
space-hyperspace plane, 72
space-hyperspace-propertime domain, 81
spacelike interval, 16
space-propertime diagrams, 51
space-propertime path, 54
space-propertime plane, 72
spacetime calibration, 40
spacetime diagram, 17, 31
spacetime geodesic, 84, 87
spacetime interval, 16, 41
spacetime projection, 41
special relativity, 16
speed of gravity, 109
spherical coordinate system, 22
standard candles, 208
superclusters, 161
superior conjunction, 122, 123
